COMMENTS

- I'm sorry we missed each other today. I knocked on your door when I arrived.

WHAT I DID AND WHAT TO EXPECT

- Today, I applied fertilizer, preemergent crabgrass control, and broadleaf weed control. This will help thicken your lawn, improve its color and prevent annual grasses and other weeds from becoming a problem later on. This treatment will also control any broadleaf weeds in the lawn. Allow 7-21 days for weeds to begin to curl.

WHAT I RECOMMEND

- I recommend mowing your Bermuda lawn at 1 to 1.5 inches to encourage new growth and to reduce thatch buildup.
 - In the absence of rain supply one-half to 1 inch of water 1 to 2 times weekly. A rain gauge or even a tuna can will make a good measuring device.
-
- Stay off of areas until treatment has dried.
 - How am I doing? Go to TruGreen.com, Account login, click on the Send us your feedback link. The feedback helps us give the best service. Please make sure you refer to me by name! Thank you!
 - If you have a neighbor that could benefit from the service, I would appreciate a recommendation. Thank You!
 - I made sure to close the gate after I was done with the treatment.
-
- Thank you for choosing TruGreen. It was a pleasure to serve you today.
