COMMENTS

- When I arrived, I knocked on your door to speak with you about your service. I'm sorry I missed you.

WHAT I DID AND WHAT TO EXPECT

- Today, I applied fertilizer and preemergent crabgrass control. This will help thicken your lawn and improve its color as well as prevent annual grasses and other weeds from becoming a problem later in the summer.
- Today, I treated for broadleaf weeds in your lawn. You should see weeds begin to decline in 7 - 21 days. For best results avoid mowing for 24 hours.

WHAT I NOTICED

- I noticed your lawn needs water.

WHAT I RECOMMEND

- I recommend mowing at the proper setting for your grass type during the season to promote a thick healthy turf. Mow often enough to remove no more than 1/3 of the grass; mulch clippings into the lawn.
- Your lawn would benefit from more frequent mowing, so that no more than 1/3 of the grass blade is removed.
- In the absence of rain supply one-half to 1 inch of water 1 to 2 times weekly. If local restrictions allow; you can use a tuna can as a measuring tool.

- How am I doing? Go to TruGreen.com, Account login, click on the Send us your feedback link. The feedback helps us give the best service. Please make sure you refer to me by name! Thank you!

- Thank you for choosing TruGreen. It was a pleasure to serve you today.
- Please contact us if you have any questions or other concerns. Thank you for choosing us.
