COMMENTS

- Hello! It was a pleasure speaking with you today. We really appreciate your business. As a follow-up to our conversation, I've left you my notes below and my recommendations for care between visits.

WHAT I DID AND WHAT TO EXPECT

- Today I treated for broadleaf weeds and annual grasses in your lawn. You should see weeds turn color and begin to decline in a few weeks. For best results avoid mowing for 24 hours.
- Today, I applied fertilizer to thicken up your lawn and improve its health and color.

WHAT I NOTICED

- I noticed some areas of your lawn are a different color. Different grass types can be different shades of green.

WHAT I RECOMMEND

- Please contact me to discuss the color due to differing grass types if this is a concern.
 - I recommend mowing at the proper setting for your grass type during the season to promote a thick healthy turf. Mow often enough to remove no more than 1/3 of the grass; mulch clippings into the lawn.
 - In the absence of rain supply one-half to 1 inch of water 1 to 2 times weekly. A rain gauge or even a tuna can will make a good measuring device.
-
- How am I doing? Go to TruGreen.com, Account login, click on the Send us your feedback link. The feedback helps us give the best service. Please make sure you refer to me by name! Thank you!
-
- Thank you for choosing TruGreen. It was a pleasure to serve you today.
 - Please chat with us using your TruGreen mobile app or access your account on TruGreen.com 24 hours a day if you have any questions or other concerns. Thank you for choosing us.
