COMMENTS

- Hello! It was a pleasure speaking with you today. We really appreciate your business. As a follow-up to our conversation, I've left you my notes below and my recommendations for care between visits.

WHAT I DID AND WHAT TO EXPECT

- Today, I applied fertilizer to thicken up your lawn and improve its health and color.

WHAT I NOTICED

- I noticed the lawn is mowed too short.
- I noticed areas of your lawn are being mowed too short causing turf damage.

WHAT I RECOMMEND

- Please raise the mowing height one to two settings higher for a healthier, more attractive lawn.
- Please raise your mower height to prevent lawn damage. Mowing too short promotes weed growth and decreases lawn density.
- In the absence of rain supply one-half to 1 inch of water 1 to 2 times weekly. A rain gauge or even a tuna can will make a good measuring device.
- Please water in today's application with 1/2 inch of irrigation if rain is not forecasted for best results.

-
- University experts have recently announced the negative impacts on warm season lawns due to cooler nights and increased wind occurrences - warmer weather will aid in the recovery of areas of your lawn
 - How am I doing? Go to TruGreen.com, Account login, click on the Send us your feedback link. The feedback helps us give the best service. Please make sure you refer to me by name! Thank you!

- Thank you for choosing TruGreen. It was a pleasure to serve you today.
- Please chat with us using your TruGreen mobile app or access your account on TruGreen.com 24 hours a day if you have any questions or other concerns. Thank you for choosing us.
