COMMENTS

- Hello! It was a pleasure speaking with you today. We really appreciate your business. As a follow-up to our conversation, I've left you my notes below and my recommendations for care between visits.

WHAT I DID AND WHAT TO EXPECT

- Today, I treated for broadleaf weeds in your lawn. You should see weeds begin to decline in 7 - 21 days. For best results avoid mowing for 24 hours.
- Today, I applied preemergent crabgrass control. This will help prevent annual grasses and other weeds from becoming a problem throughout the growing season.

WHAT I NOTICED

- I noticed some difficult to control weeds in your lawn today.

WHAT I RECOMMEND

- Your lawn quality and appearance would benefit by alternating your mowing direction weekly.
- In the absence of rain supply one-half to 1 inch of water 1 to 2 times weekly. A rain gauge or even a tuna can will make a good measuring device.
- Today's treatment will help but additional applications will be required for desired control.

- Thank you for choosing TruGreen. It was a pleasure to serve you today.
- Please chat with us using your TruGreen mobile app or access your account on TruGreen.com 24 hours a day if you have any questions or other concerns. Thank you for choosing us.
